

Bachelor of Science in Nursing

Nicole Olshanski

*Assistant Professor /
Program Director*

✉ nolshanski@thiel.edu

To be the best kind of nurse, you need the best kind of education.

To make your way as a nurse in our modern healthcare system, you need more than practical training. You need to develop creative, critical thinking, analytical and communications skills so strong that they will never desert you no matter how stressful the conditions under which you practice.

That's why you need to study for your Bachelor of Science in nursing at Thiel College. Thiel has formed a strategic partnership with the Sharon Regional Medical Center School of Nursing, which has been preparing students to practice as registered nurses since 1899. This experience combined with Thiel's century and a half tradition of education in the liberal arts and sciences means you don't have to sacrifice either state-of-the art scientific training or the benefits of a liberal arts education.

"As a nurse, we have the opportunity to heal the heart, mind, soul and body of our patients, their families and ourselves. They may forget your name, but they will never forget how you made them feel."

Maya Angelou

Study nursing at Thiel College and you will learn:

- The critical thinking, interpersonal and technical skills needed to provide care in diverse settings to diverse patients
- Leadership, responsibility, and accountability in addressing healthcare issues
- Understanding of healthcare policy, finance and regulatory environments to advocate for patient-centered care
- Outstanding oral and written communication skills with patients, families and the entire healthcare team
- Caring professionalism and a true understanding of moral, ethical and legal standards of conduct

There has seldom been a better time to choose a profession where the desire to help others is honored.

The nursing profession has always offered opportunities to those who believe in the importance of caring for others. But seldom can bringing comfort be combined with the opportunity to build a successful career than right now.

According to the American Nurses Association, "By 2022, there will be far more registered nurse jobs available than any other profession, at more than 100,000 per year." The Bureau of Labor Statistics reports there will be a need for 1.1 million new registered nurses to provide for healthcare expansion, replace retirees and avoid a nursing shortage.

Here are some of the ways you can put your Thiel Bachelor of Nursing degree to work:

- **Nurse Case Manager.** Earn an average annual salary of \$71,836 evaluating patients' needs to determine effective care plans and communicate with healthcare and insurance providers on behalf of patients
- **Home Health Nurse.** Earn an average annual salary of \$62,138 traveling to patient' homes or working in an assisted living facility
- **Psychiatric Mental Health Nurse.** Earn an average annual salary of \$64,129 providing specialized care to patients with psychiatric disorders
- **Nutrition and Fitness Nurse.** Earn an average annual salary of \$71,730 working in health clubs, and surgical recovery sites and focusing on improving client or patient health through nutrition, exercise and stress management
